

Scalability & Future Plan

Date	4 JULY 2026
Team ID	SWUID2026215775
Project Name	Credit card approval prediction
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Supports only a limited number of applicant features	May reduce prediction accuracy for complex cases	High
2	Handles only single-user requests efficiently	Performance may decrease with many concurrent users	Medium
3	No user authentication and role-based access	Security and access control are limited	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited users	Deploy on cloud infrastructure with load balancing
2	Data Storage	Uses a basic local datasets	Integrate a cloud database such as postgresSQL or mongoDb
3	Performance	Single ML model prediction	Optimize the model and enable faster interface with caching
4	Security	Basic application security	Add user authentication, HTTPS, and secure API access

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	Add user login and application history	2 month	Improved security and user experience
Phase 3	Deploy on cloud with database integration	3 months	Better scalability and reliability
Phase 4	Integrate explainable AI(XAI) and real time analytics dashboard	Future release	Increased transparency and better decision support
